Note: All section corners and traverse points were initially surveyed with G.P.S. Railroad plan information was used for the railroad alignment and control for the railroad was established by existing railroad bridge location. Deed information and G.I.S. maps from McPherson County were used to verify railroad right of way.
Note: All distances are calculated/measured. No title work was done by this surveyor for this survey. Parcels surveyed for this survey are subject to any easements or restrictions of record. See pages one and two for legal descriptions.
