

The above is a plat of a survey made by me Jan 15 for E K Carey to determine the location of the corners of lot seven in block one of Clark's addition to McPherson.

I found the old stone at the southeast corner and also an old stake which I took to be the original stake for the southwest corner. An iron rod was driven to the side of this stake so the top is directly over the center of the stake. The northeast corner is marked with an iron rod. It was not possible to drive an iron rod for the northwest corner as the location is occupied with a tree so an iron rod was driven exactly two feet east of the northwest corner. The dimensions of the lot are as shown above.

Cuy Hall, County Engineer.
