

**Field Procedure:** Some question arises out of the descriptions of the two current owners within the Southwest 1/4 of Section 19, T19S-R5W concerning the intent of the descriptions. Each parcel is deeded as the East 1/2 and the West 1/2 of the said Southwest 1/4 of Section 19. I researched the history of the deed descriptions back to the first split of the Southwest 1/4 of said Section 19 and no mention of the fractional division of the Southwest 1/4 is found throughout the history of the division of the E 1/2 and the W 1/2 of said Southwest 1/4. I retraced the survey and legal descriptions of U-S 56 highway and found that K.D.O.T. divided the Southwest 1/4 of Section 19, T19S-R5W in half when taking extra road right of way for the reconstruction of US-56 Highway in 1997. I divided the Southwest Quarter of Section 19, T19S-R5W along the proper line to divide the said quarter in half in the N -S direction on 7-30-2004. The boundary line that was ran 7-30-2004 was based on equal acreage for the landowners to the East and west in the S.W. 1/4 of said Section 19. The purpose of this new line, ran 4-22-2005 is to divide the S.W. 1/4 based on the fractional nature of Section 19. The landowner to the east is allotted 80 acres in proportion to the shape and size of the S.W. 1/4 of Section 19. I used a Nikon DTM-522 total station to read distances and turn angles. I placed 1/2" x 24" rebars with plastic I.D. caps at the property pins I set.
