

### Surveyor Notes:

On April 8 & 9, 2004 researched records McPherson County Public Works. In addition to GLO, found J.D. Chamberlain, McPherson County Surveyor record survey Book A page 292-293 set Lime Stone 10"x10"x4" at center of section 6. Found Garber 1995 survey of Section 6.

On April 15, 2004, E. Krehbiel, township operator, and I looked for West and South Quarter corners of Sec. 6 with motor grader and we found no stones. Also looked for center stone – which was not found. I used the Garber survey record distances and angles to calculate the center of the section and proceed with survey as shown.
